PARASOFT   **Secure Coding Standards With Parasoft**

• Products

Satisfy CERT coding standards for C, C++ and Java applications with automated enforcement and detailed reporting. Ensure that your software adheres to industry-recognized security

What Is CERT?

The CERT secure coding standard is a set of guidelines for writing secure code by avoiding coding constructs that are known to be vulnerable. It provides best practices that mitigate common security vulnerabilities. In the CERT coding framework, priority

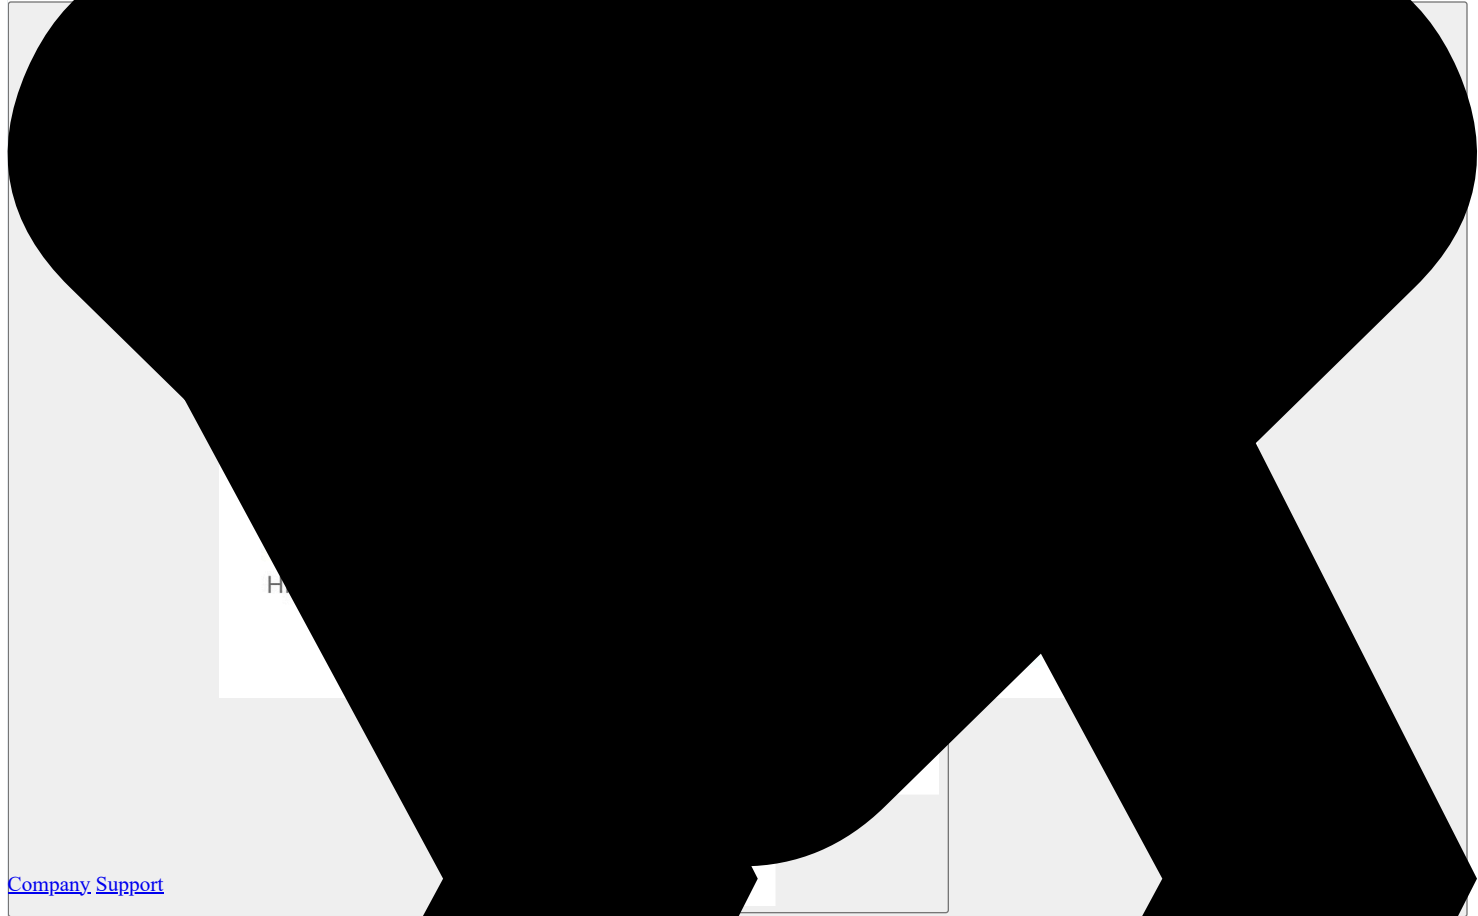

...ing your code by ...ilities by establishing best

- Severity
- Likelihood of someone exploiting the vulnerability
- Remediation cost

It's divided into levels: L1, L2, and L3.

L1 represents high severity violations with high likelihood and less effort to fix. These are the most important to address and indicates serious problems that are less complicated to fix.

Using CERT's

Benefits of Parasoft

Parasoft's C/C++test and Jtest enable organizations to create, manage, and execute tests. Customized run-time AI to suggest code improvements.

Best Practices to

To effectively manage C/C++ security, organizations should follow these best practices:

- Automated software testing
- Build Application with Coverage Monitoring
- Build Application with Full Monitoring
- Build Application with Memory Monitoring

CERT

Organizations can protect sensitive data and reduce the risk of data breaches and overhead. Organizations can:

[Learn More](#)

The image shows a webpage for Parasoft's CERT Secure Coding Standard Compliance. A large black redaction overlay covers the majority of the page content. Visible elements include:

- Top Navigation:** "Azure DevOps" and "Parasoft" logos.
- Left Sidebar:** "Company Support" link, "Parasoft" logo, and a list of products including "SonarQube", "Integrations", and "Learn More".
- Main Content Area:** Partially visible text includes "Compliance Requirements", "Test coverage", "Automated software testing", and "Analysis".
- Bottom Section:** "Integrations" and "See All Integrations" link.

Renowned

Why

Our solutions are designed to eliminate security issues, improve code quality, and accelerate development.

Dedicated

Design and development teams can use Parasoft's [Static Code Analysis](#) to find and fix security vulnerabilities before they reach production.

End-to-End

Organizations can get comprehensive coverage. Get support from our [Company Support](#) team.

Trusted

Parasoft is a trusted partner for many leading organizations, including NASA, Lockheed Martin, and the U.S. Navy.

Future-Proof

The best way to protect your code is to use the latest security tools. Parasoft's [Static Code Analysis](#) is constantly updated to keep pace with the latest security threats.

Free

Expand your security coverage with Parasoft's [Static Code Analysis](#) for free.

Parasoft is a leading provider of security tools, helping organizations adhere to the CERT C Coding Standard. [See All Integrations](#)
